Powering 30 years of touchless performance

THE BOLD LOOK
OF **KOHLER**®

HYBRIDenergy system

Powering 30 years of touchless performance

Kohler is proud to introduce the Hybrid energy system with its world-class Insight™ Touchless faucet portfolio. Coupled together, these revolutionary technologies are changing the conversation about conservation.

It's simple, really. Our Hybrid energy system features a hybrid energy cell that provides maintenance-free power for 30 years. That means no turbines, no photovoltaic cells, no periodic battery replacement. It just works without hassle. Day after day, month after month, year after year.

Innovative

We know what you're thinking. Thirty years? Impossible! We agree. It is impossible if your only gauge is the status quo. The Hybrid energy system features patented technology that prevents high-current draws, resulting in a very long life. Plus, it doesn't require constant use, solar power or repeated maintenance to operate.

Economical

If most of today's commercial budgets are in danger of decreased funding, what's the solution? We have an idea. Cut down on costly manpower and battery replacement. The Hybrid energy system is quick to install and doesn't require regular battery replacement. So you can save your budget from hours of manual labor.

Green

The Hybrid energy system is created with environmentally friendly materials, free of mercury and heavy metals. Since Insight Touchless faucets run on hybrid energy cells, they prevent untold numbers of alkaline and lithium batteries from burdening the world's landfills.

Kohler's Recycle Program

When it's time to replace your hybrid energy cell, Kohler will recycle it at our in-house sustainability facilities.

3 Decades. 3 Stages.

Kohler combines the innovative technology of the Hybrid energy system with the adaptive infrared technology of Insight[™] faucets to offer an extremely long-lasting energy solution. The blend of greater power storage and reduced discharge allows the hybrid energy cell to power the Hybrid energy system for 30 years. Or, in other words, the hybrid energy cell can complete at least 1.5 million cycles (based on one use every 10 minutes, 24 hours a day, 7 days a week, 365 days a year for 30 years). And here's how:

1. Insight Sensor Technology

Insight sensors feature proprietary circuit technology that requires only a fraction of the power standard infrared sensors use. Our patented low-energy-draw sensor technology allows the faucet to harvest the full potential of the power source.

2. Internal Capacitor

The Hybrid energy system features a hybrid internal capacitor, which protects against high-current draws and preserves the life of the hybrid energy cell for 30 years or more.

3. Energy Storage

The Hybrid energy system is uniquely engineered to perform with little to no self-discharge and store energy significantly longer than a traditional battery.

HYBRIDenergysystem

Powering 30 years of touchless performance

Insight™ Touchless Faucets

KOHLER® faucets with Insight technology feature an advanced infrared sensor that adapts to its environment. After analyzing the surrounding area, Insight technology calibrates the sensor to eliminate false actuations and optimize the faucet's performance for decades to come.

Additional Features

- Solid brass construction
- 0.5 gpm non-aerated, pressure-compensating rosebud spray
- Vandal-resistant aerator
- Optional Vibrant® Stainless (-VS) PVD finish

Deck-Mount

Sculpted

Deck-mount faucet with Insight technology in Polished Chrome. With Hybrid energy system.

K-7514-CP/VS without temperature mixer
K-7515-CP/VS with temperature mixer

Geometric

Deck-mount faucet with Insight technology in Polished Chrome. With Hybrid energy system.

K-7516-CP/VS without temperature mixer
K-7517-CP/VS with temperature mixer

Gooseneck

Deck-mount faucet with Insight technology in Polished Chrome. With Hybrid energy system.

K-7518-CP/VS without temperature mixer
K-7519-CP/VS with temperature mixer

Wall-Mount

Falling Water.

Wall-mount sensor lavatory faucet with Insight technology in Polished Chrome. With Hybrid energy system.

K-T11836-CP/VS 8 1/4" spout
K-11830 round Hybrid control kit

Purist.

Wall-mount sensor lavatory faucet with Insight technology in Polished Chrome. With Hybrid energy system.

K-T11837-CP/VS 8 1/4" spout 35° delivery
K-T11839-CP/VS 9" spout 90° delivery
K-T11840-CP/VS 6 1/4" spout 35° delivery
K-T11841-CP/VS 6" spout 90° delivery
K-11830 round Hybrid control kit
