

Shower Doors

THE BOLD LOOK  
OF **KOHLER**®

## Expectations for today's shower environments have evolved,

and now more than ever, homeowners are choosing shower doors over curtains to control water spray, accommodate their preferred design aesthetic, and provide spa-like luxury and comfort. KOHLER® shower doors offer innovative, beautiful designs that deliver water-tight, smooth operation. Featuring CleanCoat™ technology, every KOHLER shower door actively repels water and mineral buildup, significantly reducing cleaning time and the need for harsh chemicals.

Combining exceptional performance with an extensive selection of door styles, our shower door offering helps you create sophisticated shower spaces that reflect your personal needs and preferences. To be certain the shower door you select will deliver the desired style and performance benefits, you'll want to complete the following steps.

Determine what type of door is required.

Bath – bypass doors and bath screens

Shower – bypass, pivot or hinge doors

Steam shower – bypass, pivot or hinge doors with transoms

Corner – neo-angle, round, walk-in or rectangle doors

Select a glass style.

Several glass options are available on select doors. Depending on your design strategy and preferred level of privacy, KOHLER® shower doors offer clear, patterned and translucent glass.

Choose a frameless or framed door.

Frameless – heavier, thicker glass eliminates the need for structural framing and creates a sleek, contemporary look and feel with minimal framing. Shower door handles and towel bars are available in an array of durable, lustrous finishes to complement any bathroom décor.

Framed – a metal frame is mounted to the edges of the glass door panel, adding structure to the glass for solid operation. Frame and hardware finish options coordinate seamlessly with KOHLER bathroom fixtures and faucets.

All KOHLER shower doors feature CleanCoat™ technology, a protective layer that repels water and residue away from the glass. This innovative coating makes cleaning easy and keeps the shower door beautiful.

Determine the correct measurements for the door opening.

A. Top Width

Measure the distance from wall to wall at the top. If this differs slightly from the bottom width, use the larger measurement.

B. Bottom Width

Measure the distance from wall to wall at the bottom. If this differs slightly from the top width, use the larger measurement.

C. Height

Measure the distance from the top of the bath ledge or shower base to the top of the wall unit or tile wall where you want the door to be located. Select a door with a maximum opening equal to or greater than your measurements.

# Bath Screen

Designed to multitask efficiently while providing stylish, contemporary appeal, KOHLER® bath screens embody simplicity and flexibility.

## What are the benefits of choosing a bath screen?

Three panel screens extend to nearly four feet and function as an effective water shield or fold conveniently out of the way into a single 20-inch panel. Engineered to pivot into the bath when folded, bath screens ensure that water remains in the bath and not on the floor. The trackless, hinged design allows bathers to rest their arms comfortably and affords easy access to the bath.

## Where would I use a bath screen?

Because they provide increased accessibility – similar to that of a shower curtain – with decidedly contemporary design lines, bath screens are an ideal choice for the modern family bathroom. Our bath screens accommodate baths that are five feet or more in length.

## What are the benefits of choosing a corner shower enclosure?

KOHLER corner shower enclosures provide space-saving designs that complement a variety of bathroom environments from classic to European modern. Line-matched models create a unified look for the bath while models that offer a refined, minimalist appeal showcase the details of a tiled enclosure.

## Where would I use a corner shower enclosure?

With their exceptional space-saving capacity, corner shower enclosures bring inspired design to smaller bathroom spaces. But if conserving space isn't a concern and designing an open, sleek shower environment is, KOHLER corner shower enclosures deliver the look you desire.
